

PRIVATE · BRADEN × ALEX · JULY 2026

The company hiding inside the cash engine.

A working proposal, founder to founder.

PREPARED FOR DISCUSSION · NOT AN OFFER DOCUMENT

[Skip to presentation](#)

WHAT ALREADY EXISTS

What you built.

The rare part is already here. I am not proposing that we replace it.

01

Product instinct

You see the category before most people understand it.

02

Customer trust

People ask you what to buy and act on your judgment.

03

Organic demand

The engine moves without a mature paid or lifecycle system.

04

100% ownership

You took the risk and kept control of the asset.

05

A working engine

This is operating demand—not a startup idea on a whiteboard.

Already too real to operate from screenshots.

THE ENGINE • IN YOUR NUMBERS

\$50k ORDINARY DAY FOUNDER-REPORTED • UNVERIFIED	\$96k RECENT PEAK DAY FOUNDER-REPORTED • UNVERIFIED	\$53,540.86 216 ORDERS • ONE DAY • EXCLUDING APPLE PAY FOUNDER-REPORTED • UNVERIFIED
\$1m – \$1.5m RECENT MONTHLY PROFIT CLAIM FOUNDER-REPORTED • UNVERIFIED	~85% REPORTED “NET” MARGIN FOUNDER-REPORTED • UNVERIFIED	

These are your numbers. Phase 1 exists to make them provable.

THE CEILING

The company is still held together by your hands.

That is not a criticism. It is what happens when demand grows faster than infrastructure.

FOUNDER LOAD

You personally label and pack hundreds of vials.

FREEDOM

You said you cannot take a travel day because orders must go out.

FINANCE

Your mom covers CFO work part-time; “net” is not yet one reconciled definition.

CREATOR CHANNEL

Connor manages relationships; roughly 3–5 affiliates are active.

DATA

Analytics are broken, so attribution and contribution are unclear.

CONTINUITY

Banking and payment interruptions compete with growth every week.

You own the engine.

I build the company around it.

I AM NOT SELLING POSTS. I AM INSTALLING AN OPERATING SYSTEM.

Truth & infrastructure.

01 Financial command center Orders → settlements → contribution → reserves → distributable cash.	02 Attribution rebuild One ledger for creators, links, codes, returns, and actual profit.	03 Payment continuity Documented processors, reserves, escalation, and truthful continuity plans.
04 3PL handoff Inventory transfer, lot controls, shipping SLAs, and Braden out of packing.	05 Vendor ownership One accountable operator across agencies, developers, fulfillment, and tools.	06 Operating perimeter Counsel-defined products, channels, claims, stop rights, and migration gates.

People & growth.

07 Organization & hiring Clear owners, scorecards, weekly cadence, recruiting, training, and management.	08 Creator operating system Recruiting, onboarding, agreements, briefs, approvals, attribution, and payouts.	09 Lifecycle engine Email, SMS, referrals, cohorts, support signals, and measured repeat behavior.
10 Customer experience Fast support, issue intelligence, knowledge systems, and retention ownership.	11 Founder media A real content machine that turns your expertise into compounding authority.	12 Creator council Miami dinners, content weekends, retreats, and a room people earn their way into.

REPLACEMENT VALUE

The backend alone is a real engagement.

Then add company-wide accountability for people, growth, finance, execution, and founder freedom.

STANDALONE OPERATING BACKEND BUILD

\$30K-\$40K

System architecture, workflows, data model, portal logic, and implementation design.

INTEGRATED OPERATING PARTNERSHIP

> THE SUM OF ITS PARTS

Systems plus leadership, execution, talent, creator distribution, management, and enterprise-value creation.

ILLUSTRATIVE REPLACEMENT-VALUE FRAMING · FINAL SCOPE AND ECONOMICS FOLLOW VERIFIED ACCESS.

PHASE 1 • 30 DAYS

\$50,000 *prepaid.*

Source-of-truth and
operating-design sprint.

WHAT HAPPENS

Data room, settlement and order reconciliation, financial close, operating map, 3PL transition plan, and 90-day implementation design.

WHAT IT IS NOT

No public President title, no OVO endorsement, no creator deployment, and no custody of funds, product, or inventory.

WHAT CLEARS IT

Economics verified, ownership confirmed, insurance reviewed, and an independent counsel-defined operating perimeter both parties can follow.

AFTER THE SPRINT CLEARS

President & Operating Partner.

GUARANTEED CASH	EARNED OWNERSHIP	MEASURED UPSIDE
\$30k_{/mo} Paid monthly. Team and implementation budget remain company-funded and separate.	10% 2.5% at closing · 2.5% at day-90 systems milestone · 5% over 24 months.	15% Of incremental Collected Contribution Profit above the locked baseline.

PERFORMANCE SHARE · MONTHLY PAYMENT · 24-MONTH TERM · BEFORE DISCRETIONARY REINVESTMENT

YOUR VERIFIED PRE-DEAL ENGINE IS NEVER IN THE PERFORMANCE POOL. COVERED CHANNELS MUST SIT INSIDE THE APPROVED OPERATING PERIMETER.

Skip to presentation

CHOOSE WHAT YOU WANT TO PRESERVE

Two fair structures.

PREFERRED · CASH-RISK HYBRID

\$30k / month

10% earned equity

15% incremental CCP · 24 months

Preserves more of your ownership. Pays me on measured, profitable value created after the baseline.

ALTERNATIVE · OWNERSHIP-HEAVY

\$35k / month

Up to 15% earned equity

Real quarterly distributions

No performance share. Preserves more current company cash and makes me a larger long-term owner.

~~25% OF ALL EXISTING REVENUE — REJECTED~~

I do not take a permanent share of the engine you already built.

Skip to presentation

Clear enough to protect the relationship.

BRADEN RETAINS Overwhelming majority ownership The verified pre-deal baseline Founder vision and public role Product and category authority within the agreed perimeter Major sale and capital decisions	ALEX / OVO HOLDS Earned equity under the chosen package The company-building operating mandate OVO's pre-existing and generalized operating IP Data, information, audit, distribution, pro-rata, and tag rights Successor and anti-circumvention protection	BIOLOGIX OWNS Customer, order, and product data Its brand, catalog, and company accounts Company-specific operating records Paid bespoke work product under the definitive IP schedule The team and vendor relationships it funds
NEVER ALEX'S CUSTODY OR AUTHORITY Customer funds · Inventory · Manufacturing · Product release · Prescribing · Medical advice		

THE NEXT MOVE

Start with the truth.

Not a title. A 30-day paid verification sprint and a data-access session. If the engine is what you believe it is, we can move extremely quickly.

THIS WEEK

Paper the sprint · Open source systems · Lock the baseline · Build Day 1
